Giza , Egypt

PROFILE

DotNet Developer with solid hands-on experience in building web applications using ASP.NET Core, C#, and SQL Server. Completed an intensive .NET Diploma with practical projects and mentorship experience. Passionate about clean code, SOLID principles, and continuous learning. Actively seeking a Junior .NET Developer role to contribute to a collaborative engineering team.

EDUCATION

Culture and Science City — 6th of October, Egypt 2018 – 2022
Bachelor's Degree in Computer Science 6 October, Egypt
Grade: Very Good
Sep 2018 – Jun 2022

PROFESSIONAL EXPERIENCE

EraaSoft Trainee 08/2024 – 01/2025
Cairo, Egypt

- Completed a .NET Backend Development Diploma with hands-on training in ASP.NET Core, MVC, and Web APIs.
- Worked in a team-based environment following Agile practices.
- Built full-stack applications with Entity Framework, SQL Server, and integrated third-party services like Stripe, SignalR, Localization and email sender.

DotNet Mentor 01/2025
Cairo, Egypt

- .NET mentor at EraaSoft Company.
- Mentored junior trainees and provided guidance on best practices in ASP.NET Core, C#, and SOLID principles.

SKILLS

Programming Languages	Web Development	Database	Tools & Platforms
C#	.Net Core , Asp. Net MVC , ASP .NET API, HTML5, CCS3, JavaScript, Bootstrap, SASS, TypeScript, Angular	SQL	Visual Studio, Visual Studio Code, SQL Server, Git, Swagger, Postman, Scalar, Microsoft(Word, Excel, Power Point)
Other Skills Data Structure, OOP, Solid Principles, Problem Solving, Design Patterns			

PROJECTS

Bietak– Real Estate & Student Housing (API) 04/2026 – Present

- Designed and documented a RESTful API using ASP.NET Core, following Clean Architecture and Repository Pattern to ensure high maintainability and performance.
- Developed a sophisticated search engine using NetTopologySuite and SQL Server Spatial types to handle complex location-based queries and polygon-based area mapping.
- Implemented Response Caching and Rate Limiting strategies to enhance API responsiveness and protect resources from excessive traffic.
- Engineered an advanced authentication system using JWT and External Providers, reinforced with SMS OTP for secure login and a robust Image Validation pipeline.

ElClass Project (MVC) 01/2026 – 04/2026

- Developed a high-performance LMS that manages complex content workflows and instructor-student interactions with a strong emphasis on data security and operational efficiency.
- Developed a centralized administrative dashboard providing full control over instructor workflows, student progress tracking, and course lifecycle management.
- Engineered a real-time notification system to enhance user engagement and provide instant updates on course progress.
- Enhanced user engagement by developing an in-platform chat system and real-time alerts, allowing for direct coordination and instant feedback between tutors and learners.
- Integrated Zoom SDK to facilitate seamless virtual classrooms directly within the platform, managed by a dynamic scheduling system for lectures and live sessions.
- Implemented Multi-language support (Arabic & English) and Location-based dynamic content, ensuring a personalized user experience tailored to different regions.
